### **DETAILED ACTION**

1. This office action is in response to applicant's after final amendment filed on 6/23/2004. Claims 2-6 have been amended. Claims 2-11 and 13-21 are pending.

#### ***Allowable Subject Matter***

2. Claims 2-11 and 13-21 are allowed.

The following is an examiner's statement of reasons for allowance:

The present invention is directed to methods and apparatus for validating that transformations that are expected to occur in an IP network tunnel are performed successfully. The closest prior art, Ylonen et al. (U.S. Patent No. 6,438,612) fail to teach the validation process that validating transformations on the IP packets are performed successfully in light of the Specification includes "a predetermined value of time-to-live set in the IP header such that an ICMP message is generated within the tunnel in response to the value and examining the content of the ICMP message to determine whether the transformations were done properly" (in claim 2); "establishing a network device level socket and examines packets passing through it and returns a copy of a transformed packet" (in claim 3); "receiving the IP packet from the dummy interface that sends back the packet it receives during the validation step" (in claim 4); "generating IP packet in the first end station with marking on the communication tunnel and validate that transformation were done properly" (in claim 6); and "invoking a validation process on the originator that test and verifies packets on the originator have been properly performed and requesting at least one other participant in the

Art Unit: 2134

tunnel to perform the same validation process and verify that the other participants in the tunnel can communicate with the originator of the validation process" (in claim 11). The art of record, either singularly or in combination, does not anticipated or render the above limitations obvious.

The remaining claims 5, 7-10 and 13-21 are dependent claims. Therefore, these claims are patently distinct over the art of record for the reason above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
